The CCDS also provides centralized messaging to and from providers through a message board and a chat feature, which allows providers to chat live to obtain assistance.

### Spotlight on Success

Spotlight on Success aims to share stories from local programs that are building community partnerships in order to strengthen and coordinate childhood programs.

Photo Credit: Becky Simpson, Director of Early Childhood, Lebanon R-III School District

In August 2023, the Lebanon Early Childhood Center, the Jordan Valley Community Health Center's Women and Children's Clinic, and the Jordan Valley Family Development and Early Childhood Education Center opened their doors at the Robert W. Plaster Center for Student Success. This marks, not only the expansion of services and resources for the youngest members of the community, but the expansion of a partnership between these organizations that began in 2017.

This partnership between the Lebanon R-3 School District and Jordan Valley provides access to health care and learning under one roof and even garnered support from the State. In July 2022, Governor Mike Parson signed House Bill 3020, which provides \$5 million in State funding for the projects. The projects

were also made possible through a \$1 million donation from the Robert W. Plaster family.

The school district and local health care entities have identified a need in the community to provide preventative health care and other services starting from birth through a child's early years. The goal of the Early Childhood Center and partnership with Jordan Valley is to support medical, nutritional, dental, mental health, social service, and educational needs in a central location for the community's early childhood families. The center also provides community-based support for parents through services and education, such as Parents as Teachers parent education program, aimed at equipping parents with what they need to feel and be successful.

Jordan Valley Community Health Center has expanded its partnership with Lebanon schools by establishing a women's and children's clinic with a large focus on providing direct services and supports to Lebanon R-3 students. By offering health and dental care, and other services like occupational therapy all under one roof, it makes resources more readily accessible for the community's youngest children and their families. Jordan Valley's Family Development and Early Childhood Education Center provides care for children six weeks to 12-years-old through child care, preschool education, and afterschool care. These students receive their medical, dental, behavioral health, and any therapies they might need while in the classroom, which provides easy access to care and relieves some stress for working parents.
